# Limitations to Reporting ATC data

- ▶ Grantees were not provided reporting templates, so data was not streamlined across all ATC grantees.
  - ▶ This makes it hard to compare data—each organization gets to decide how to present the information requested for reporting.
- ▶ Progress reports vary in data collected, some are entirely narrative, while others are more detailed and report quantitative data that show client demographics and outcomes.
- ▶ Several organizations are out of compliance with their progress reports affecting data outcomes.
- ▶ Transfer of contract administration roles
- ▶ **Effect:**
  - ▶ We are not seeing a full picture of how M110 may have increased access to care and low-barrier services. It depends entirely on how thorough a grantee was in reporting their data.

# How many new Oregonians have accessed services through ATC funding?

▶ **16,076 individuals**

▶ Service-category specific information defined for 10,843 individuals. Limitations to data explained in previous slide.

## Engagement by Service Category

- Harm Reduction Services (59.7%)
- Assisted with Housing Needs (15.5%)
- Peer Support (11.7%)
- Screened/Clinical Assessment (11.3%)
- Entered treatment (0.85%)
- Supported Employment (0.67%)
- Pregnant clients, used Peer Doula (0.19%)

# Supported Employment

- ▶ Only 0.67% of client-reported service types engaged with.
- ▶ **The central goals of SE Work's "Learn and Earn" program:**
  1. Learn new job skills in a safe environment supportive of the transitional purpose of the program.
  2. Obtain a good reference with an employer.
  3. Allow time for all other commitments required for a successful active treatment and recovery program.
- ▶ **ATC funding helped to expand their program to 5 partner organizations, increasing access to more sites for supported employment.**
  - ▶ Includes resume building, job training, peer support

# Notes on Other Services Provided:

1. ATC funding helped to serve people **harm reduction supplies** on a **need basis** vs **rationing**.
2. Helped to increase hours for naloxone and harm reduction supply distribution (staff hours)
3. **Translation of program materials into Spanish** (ex: Service/ Treatment plans, “Services in Spanish” webpage)
4. **Tri-met passes** were distributed to clients to go to treatment, interviews, and places of employment.
